SEALERS

Tenax Proseal Stone Impregnator Sealer

Tenax Proseal is an ultra premium grade stone impregnator sealer.

Tenax Proseal Ultra Premium Stone impregnating sealer is rated by fabricators as one of the best stone sealers to be used on natural stone. Tenax Proseal is suitable to protect stone against practically all potential stain causing items.

Tenax Proseal does not change the natural colors of the stone and allows the stone to breathe without leaving a film on the surface. The protection will last up to 4-5 years if the product is applied correctly on the surface and areas that are not under direct wear and use.

Tenax Ager Stone Color Enhancer and Sealer

Tenax Ager Stone Color Enhancer and Sealer is suitable for enhancing all stone.

Tenax Ager is used to obtain a “wet” effect both for indoor and outdoor applications. Also suggested for use on surfaces that are flamed, rough or sanded. Tenax Ager provides a deep rich color. Excellent for matching the edge of the stone with the surface polish. Outstanding for hiding micro fissures and small scratches. It also protects surfaces against oil and water and provides protection against stains. Tenax Ager Stone Color Enhancer and Sealer works well in both indoor and outdoor environments, is UV Stable and does not change color when exposed to the sun.

Tenax Ager is not just an enhancer. Tenax Ager is a PREMIUM grade high quality sealer that can last for years and provides protection against stains.

SERVICES

CUTTING / SHAPING / FABRICATION

We custom cut and shape stone and we custom fabricate your stone designs

STONE MATCHING

We provide stone matching services to match new stone with old stone.

ON-SITE TEMPLATING SERVICES

SPLITTING

Stone Guillotine

We split stone on-site to create snapped stone products like wall stone.

Splitting stone reveals the deeper colors of the interior of the stone. Splitting also straightens up the edge of the stone for a more uniform, but still natural, look.
